Alex Morgan

Fictional sample candidate | Data Analyst | San Francisco Bay Area

PROFESSIONAL SUMMARY

Junior data analyst with experience cleaning operational data, writing SQL queries, automating Python reports, and building Tableau dashboards. Interested in data analyst and analytics engineer roles.

TECHNICAL SKILLS

Programming: Python, SQL, Pandas, NumPy, Excel
Analytics: Data cleaning, exploratory analysis, regression, KPI reporting, Tableau, Power BI
Databases: PostgreSQL, SQLite, relational joins, ETL fundamentals

EXPERIENCE

Junior Data Analyst | Harborline Retail (fictional) | 2024–2026

• Wrote SQL queries to combine sales, inventory, and customer tables for weekly reporting.
• Automated recurring Excel reports with Python and Pandas, reducing manual data preparation.
• Built Tableau dashboards to track revenue, order volume, and product performance.

Operations Reporting Intern | Northstar Supply (fictional) | 2023

• Cleaned shipment records and prepared KPI summaries using Excel and SQL.
• Helped investigate delayed orders using descriptive statistics and visualizations.

PROJECTS

Customer Churn Analysis — Cleaned a sample customer dataset in Python, performed exploratory analysis, and trained a logistic regression baseline.

Sales Performance Dashboard — Created a Tableau dashboard to visualize monthly sales and product trends from a relational dataset.

EDUCATION

B.S. in Information Systems | Example State University (fictional) | 2023
